Imagine an outdoor space where you can go to relax, to entertain and to spend time with the people you love best. An outdoor space that is a memory creator, where dreams become realities.

With Keystone Hardscapes, your dreams are only limited by your imagination.

Keystone Hardscapes by Pavestone brings together the best elements of two hardscapes industry leaders, Keystone Retaining Wall Systems and Pavestone. This new brand is built on a dedication to providing you with unrivaled product selection, quality, performance and customer service. We help bring dreams to life - creating outdoor spaces that are as enchanting as they are functional.

Since the 1980s, we have set the standard for excellence and innovation in the hardscapes industry. Our paving, wall and outdoor living elements are favorites of homeowners, contractors, designers and developers alike. Locally made products, nationally trusted brand. Look to us to help transform your residential or commercial property.

Eco-CityLock series is an innovative and unique narrow modular permeable paver system that parallels today’s trend of architectural alignment and visual direction. In addition to the contemporary aesthetics, the product also delivers a sustainable, permeable pavement surface. The structural interlocking spacer bars contribute resistance for premium vertical, horizontal and rotational interlock of the neighboring units. Versatility of construction affords installation patterns that can be installed in 4” stagger bond offsets or a variety of herringbone configurations. The arrangement of design intent and environmental balance make a creative solution for adding aesthetics to site work storm water management solutions.

Unit color, dimensions, weight & availability vary by manufacturer.
Eco-CityLock units share a common joint design that eliminates bond line creep to enable installation patterns previously avoided in vehicular applications. These permeable pavers increase site infiltration, helping maintain pre-development runoff volumes, peak flows and time of concentration.

Unit color, dimensions, weight & availability vary by manufacturer.
Grasstone I, made with an open-void, interlocking lattice design, creates a flat surface for intermittent paving applications. The open void allows for on-site infiltration of storm water or revegetation. Designs can use topsoil or aggregates in the grid openings depending upon desired effect. The Grasstone I concrete grid stone reinforces grassy areas that are subject to intermittent wheeled vehicular traffic.

The Venetian Stone product advent is the latest development in enhanced pavements from Keystone Hardscapes. Its uniquely attractive cleft surface sets it apart from ordinary pavers. This texture recalls Old World charm and invokes a traditional convention. The larger scale of Venetian Stone pavers lends itself to stately residential settings and more expansive commercial applications. Its modular pattern equalizes the scale of any project and is fitting to most any architectural elements.

Regal Stone Pro - RockFace 3-pc brings the latest look and appeal in architectural design with its addition of the two smaller modular components. The three-piece system separates itself by creating alternating scale and dimensions. While the system still meets the rigorous demands for both engineering and structural components, its multiple shape patterning creates new and innovative applications for site work designs.

The Harington 3-pc retaining wall system evokes the texture and look of natural stone, making a striking architectural statement. The hand-hewn facing creates a stone-like appearance while the rear lip eliminates setback and alignment issues to speed construction. Available in blended earth tone colors, these retaining wall units are a reliable, easy-to-install alternative to natural stone walls.

Reminiscent of the walls found scattered throughout the European countryside, Keystone’s Stonegate Country Manor features a smooth, weathered stone appearance. Both a backyard and structural solution, Stonegate’s refined look combines with unsurpassed design versatility to make it the product of choice for outdoor living projects, freestanding and retaining walls*.

**STONEGATE® COUNTRY MANOR®**

*Retaining walls higher than 3’ can be reached with proper engineering and the use of geosynthetic reinforcement.

WALL CAPS

Add the perfect finishing touch of architectural detail with wall caps. The smaller scale of the caps combine with the larger scale wall unit to give the completed installation a distinctive and unique appearance.

NATURAL LOOK SEALER – Water-based penetrating silicone sealer waterproofs and protects concrete, brick, masonry, pavers, and stucco surfaces. Clear sealer does not change the surface appearance. Seals from water, salts, and oils. UV Resistant.
Use For: Driveways • Patios • Walls • Sidewalks • Pre-stress panels • Retaining walls • Tunnels • Loading docks • Bridge columns • Tunnels • Curb/steps

WET LOOK HIGH GLOSS SEALER – Water-based penetrating silicone sealer waterproofs and enhances the color of concrete, masonry, brick, paver, and natural stone surfaces. Seals from acids, grease, food stains, oil, salt, and more. UV resistant.
Use For: Decorative concrete • Pavers • Natural stone • Exposed aggregate • Brick • Stucco

COMMERCIAL GRADE POLYURETHANE CONSTRUCTION ADHESIVE – High performance, commercial grade adhesive designed for permanently bonding concrete, brick, marble, stone, wood, glass, aluminum, steel, PVC and tile.
Use For: Repairing broken concrete • Bonding retaining wall block and caps

POLYMERIC SAND - Polymeric Sand is a precise mixture of polymer binders and clean natural sand. Polymeric Sand will bond with the pavers/stones adding strength to the joint, as well as reliability to the pavement system. It is ideal for use on any paver surface such as sloping areas, driveways, patios, pool decks, sidewalks, etc.
Use For: Driveways • Sidewalks • Pool decks • Patios

Contact Your Local Representative for availability on the full line of QUIKRETE® products such as bagged concrete mixes, concrete repair products, and masonry products.
COLOR VARIATIONS
As in all natural materials, color in paving stones and wall stones has inherent variations. Paver and wall color is affected by the variances in the raw materials, concrete mixture, moisture content, climactic conditions, and other variations. Therefore, the colors shown are approximate representations of paver and wall colors, but should not be expected to be an exact match of what will be delivered.

THE NATURE OF EFFLORESCENCE
Another cause of color variation in paving stones and wall stones may be the natural phenomenon called efflorescence. Efflorescence, a deposit of white salts consisting of mostly calcium carbonate, may appear as a white powder on the paver or wall surface and in no way affects the structural integrity. This phenomenon occurs in all concrete and although it cannot be completely prevented from occurring, efflorescence generally will weather off and disappear over time or can be removed with cleaners at the job site.
NOTICE OF LIMITED WARRANTY: the terms of the Limited Warranty applicable to our products can be found at www.pavestone.com or can be obtained by sending a written request to c/o PAVESTONE, 5 Concourse Parkway, Atlanta, USA.

Quikrete and its subsidiaries (collectively Quikrete) reserve the right to improve its products and make changes to its specification and design without notice. The information contained herein has been compiled by Quikrete and to the best of its knowledge, accurately represents Keystone Hardscapes products and how it may be used in the applications which are illustrated. Site conditions, including load pressures acting on the wall, soil types and drainage conditions, may vary. Final determination of the suitability of the product for the use contemplated and the manner of product use are the sole responsibility of the user. Good construction practices and local building codes require the use of an engineered design when constructing retaining walls or freestanding walls in many conditions. Structural design and analysis should be provided by a qualified engineer.
